

[Agency Name]

your website is being read by AI. Is it invisible?

Most websites are blocking AI crawlers without knowing it.
A monthly AI-readiness report fixes that -- before it costs you a sale.

1

What it is

Monthly AI-readiness reports that track crawler access, schema health, and how visible your site is to ChatGPT, Gemini, and Perplexity.

2

The loop

The report finds the problem. We fix it. The score climbs. More visible to AI search every single month.

3

What you get

A clear score, a list of what changed since last month, and a prioritized fix list. Delivered as a branded PDF -- yours, not ours.

Every client site is being indexed by AI right now.

A monthly report is a reason to call. A good score is a reason to stay.
